The microsoft internet site expresses that the dwl-g132 adapter can be suitable with windows 7 64-bit, nevertheless there are usually no drivers obtainable for this device anyplace.. I handled to locate and download á driver for the wua-2340 rangebooster g usb adapter that happens to be compatible with the dwl-g132 and it finally detects the device but it's still not performing anything.. I attempted installing the windows vista-64 little bit edition to no avail so i did some further analysis.
